

# And the winner is ...

Our founder, Willis Carrier, invented modern air conditioning in 1902 and we have been innovating ever since. As an industry leader, Carrier has been at the forefront of designing world-class equipment that enhances our customers' lives. We've confidently embraced that role in shaping the industry by continuing to provide cutting-edge technology paired with a user-friendly experience.

Not only have we earned a place in millions of homes and businesses across the country, but Carrier was named the best HVAC Company of 2023 by U.S. News & World Report's 360 Reviews team. In fact, here are just a few of the additional awards we've earned recently for our efforts as we continue to push the limits of comfort:
